

GEFIER R1

Indoor UGV

SYSTEM OVERVIEW						
Product Name	GEFIER R1		Dimension	385 mm × 344 mm × 188 mm		
Core Capabilities	Multi-Physics Simulation: Native support for MATLAB, Gazebo, Isaac Sim, PyBullet & Webots					
	Autonomous Research Platform: Indoor navigation & modular payload integration			AI & Edge Computing: Optimized for NVIDIA Jetson with pre-configured AI-inference & SLAM pipelines		
	Modular UI: Optional dashboard interface for real-time telemetry			Multi-Physics Simulation: Native support for MATLAB, Gazebo, Isaac Sim, PyBullet & Webots		
PERFORMANCE						
Odometry Accuracy	Odometry Frequency	Runtime (Basic)		Battery Pack	Maximum Speed	Power Port
95–97%	30-50 Hz	6 hours (Basic)	4 Hours (Performance)	3S 15Ah Li-ion	1.36 m/s	12 V / 72 W
COMPUTE & SOFTWARE						
Primary Software Framework	ROS 2 Humble / Jazzy pre-installed					
Supported Compute Modules	Jetson Orin Nano / Orin NX					
Feedback Topics Available	SOC, Current Consumption, Voltage, Wheel Odometry, IMU, Fused Odometry, Wheel Ticks					
Teleoperation	Enabled via push-button					
UI Control Interface	Available as optional add-on					
CONNECTIVITY & INTERFACES						
Networking		Ethernet		USB		Debug Port
Wi-Fi 5, Bluetooth LE		1× Port		3× USB 3.0		USB-C
EXPANDIBILITY						
Mocap		Mounting Interface			Manipulator	
Active & Passive motion-capture marker ready		Standard extrusion & M4/M5 mounting points			SO-ARM100/101	
SENSOR & PAYLOAD SUPPORT						
Category	Sensor					
LiDAR	2D/3D (Livox, Ouster, Velodyne, RPLIDAR) via Ethernet/USB					
Vision	Stereo (ZED, Intel RealSense, OAK-D), Monocular, and Depth Cameras					
Inertial	Integrated 6/9-Axis IMU; supports external GNSS/GPS					
Custom	72W available for any custom sensors or equipment					
NAVIGATION & AUTONOMY						
Configuration	Fully configured Nav2 stack					
Packages	Obstacle Avoidance, Mapping, Localization, Trajectory tracking & Path planning					
SAFETY & POWER PROTECTION						
Protections	On board Surge, Over-voltage and Over-charge protection					
Low-Battery Safety Trigger		Motor Current Monitoring			Charging Safety	
Critical alert; 15-min shutdown buffer		Motor over-current alerts			Motor lock-out; compute power bypass	
STATUS INDICATORS (LED CODES)						
Red	Control system powered					
Yellow	Jetson booted					
Blue	Motors enabled					
Green	Push-button active → Micro-ROS + cmd_vel enabled
